

EUROPEAN SOCIETY OF NEURORADIOLOGY
Diagnostic and Interventional
ESONR – EUROPEAN SCHOOL OF NEURORADIOLOGY

ECNR - The Pierre Lasjaunias European Course in Diagnostic and Interventional Neuroradiology

Coordinators: Prof. Alex Rovira and Prof. Massimo Gallucci

Course information:

The Pierre Lasjaunias ECNR is the fundamental Neuroradiology course aimed at *neuroradiologists, established or in training*. It is based on cycles of four courses (modules), each lasting five days, dedicated to diagnostic and interventional neuroradiology. The full cycle is considered complete after the attendee has participated in all four modules, which can be done in a single cycle or in different cycles.

The scientific content of the course is determined by the Education Committee of the European Society of Neuroradiology, taking into account international standards and guidelines for training in diagnostic and interventional neuroradiology. The participating educators will be internationally renowned European experts, to be selected on the basis of their scientific background and educational skills to ensure high-quality lectures and interactive case discussions.

Learning objectives:

- To impart teaching-based lectures and workshops, rather than academic-type conferences, to transmit rather than deliver information

To provide a theoretical basis for present and future clinical practice and research in diagnostic and interventional neuroradiology

- To impart highly interactive diagnostic, interventional and mixed-type neuroradiological workshops
- To make students acquire basic neuroscience and clinical knowledge.

General Programme

The programme is very large and detailed, please check on the website: www.esnr-ecnr.org :

1st Course: Embryology/Anatomy/Malformations/Genetics

2nd Course: Tumours and Tumour-like lesions

3rd Course: Vascular Diseases

4th Course: Trauma/Degenerative/Metabolic/Inflammatory

Course examination:

- Certifications of attendance will be delivered after every year and after the full cycle and given to all participants.
- All the sessions will be followed by a specific examination with multiple-choice questionnaires, a specific certification will be sent later to those that will pass.

EUROPEAN SOCIETY OF NEURORADIOLOGY
Diagnostic and Interventional
ESONR – EUROPEAN SCHOOL OF NEURORADIOLOGY

Frequency: The course will be held twice a year as a full week's course in March and October

Location: selected by the ESNR Executive Committee
Please visit as www.esnr-ecnr.org for up-to-date information.

After attending the full ECNR Cycle and passing the relevant exams, board certified radiologists, with a neuroradiological curriculum of at least two years in a Neuroradiology Centre, will be entitled to sit the examination for ESNR Certification of

Fellow in Neuroradiology

Portuguese Neuroradiologists holding the Portuguese Specialization in Neuroradiology can apply for this Certification even if they did not attend the ECNR. Details of the exams are described in the chapter: “ESONR Final examinations and certifications”.
